WAIT, ISN'T ALL SKINCARE VEGAN?

Sadly, many animal-derived ingredients are used in popular skincare products.

When nature provides all the nourishment you need, we believe this is completely unnecessary.

3 INGREDIENTS TO AVOID

1. Oestrogen

is often extracted from the urine of pregnant horses (we're serious!) and is used as a sebum-balancing agent in cleansers.

2. Lactoferrin

is a protein commonly derived from cows' milk, saliva, tears, mucus, and bile, used for its anti-bacterial properties.

3. Glycerin

Is a compound mostly obtained from animal fats and is the second most used skincare ingredient after water. (we're using a plant-derived alternative, of course!)

Yes, some brands **put** all of that, in the stuff you **put** on your **face**!

**At Mazillo, we're proud to be certified by the Vegan Society.
We create effective skincare using plant-derived ingredients only.**
